EXPERIENCE

FrontEnd Developer | DDM2 - Benalmadena, Málaga

Mar 2022 – Mar 2023

- Skilled in utilizing front-end frameworks such as **React.js**
- Experience in optimizing website performance and implementing SEO best practices
- Collaborated with back-end teams to create functional sites and applications

Network Administrator | Qlance - Toronto, Canada

Sep 2023 – Jan 2024

- Implemented network monitoring tools to troubleshoot and resolve connectivity issues efficiently.
- Configured and maintained firewalls to ensure network security and compliance with company policies.
- Provided end-user support for network related issues and conducted training sessions on best practices.
- Built and implemented the entire **networking infrastructure** from scratch. Configured servers and essential services for optimal performance and security.

PROJECTS

Custom Operating System Development | Personal Project

Jun 2023

- Implemented **multitasking and process scheduling**, ensuring efficient execution of concurrent tasks..
- Tested the system using tools like **QEMU** and debugged issues to improve performance.

Ft_Transcendence | 42 Project

Nov 2024

- Developed a **full-stack 3D web application** using Three.js for interactive graphics and vibrant neon visuals.
- Built backend services with **APIs** for data management, **authentication**, and real-time updates.
